

Student Enrollment Data

The purpose of this student enrollment data is to furnish an in-depth understanding of the student enrollment patterns Mid-Plains Community College (MPCC) serves. In addition, this section of the report presents various statistics highlighting some College successes. (Unless otherwise indicated, enrollment data only include for-credit students.)

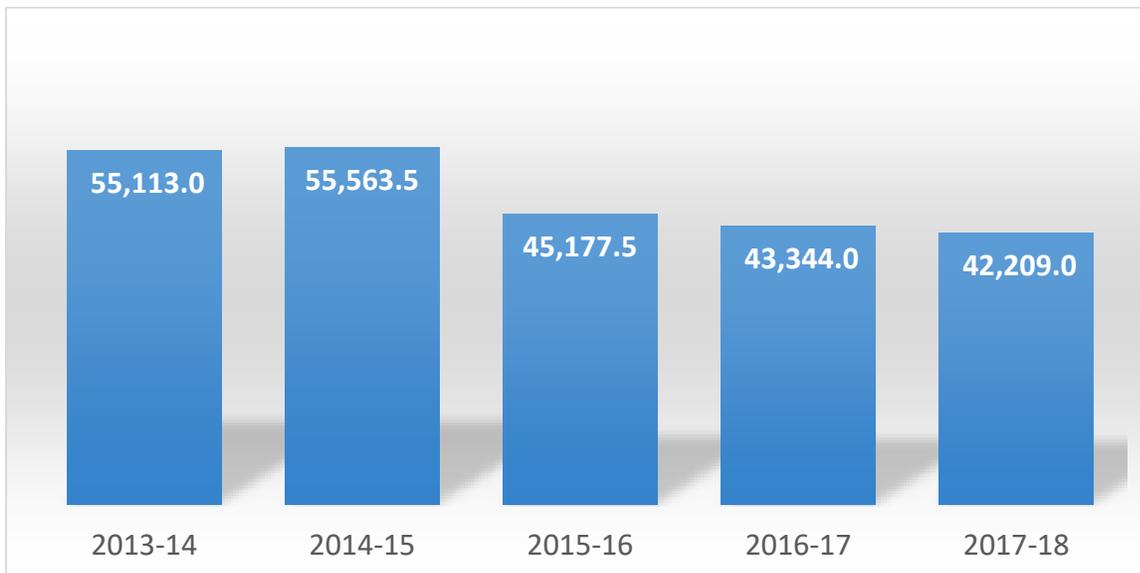

Student Enrollment

Historically, MPCC has had a strong relationship with the Union Pacific Railroad (UPRR) where employees were earning college credit through their employee training classes. However, over the last few years, the Union Pacific Railroad (UPRR) brought their employee training in-house and in 2015-16 MPCC saw the impact on enrollment of their part-time for-credit students.

Full-time students generate more credit hours (and FTE) per student, while part-time students generate a larger headcount with less credit hours (and FTE) per student. The total headcount for academic year 2014-15 represents a larger number of part-time students. With the decrease in UPRR students, the academic year 2017-18 represented the lowest headcount at 3,186.

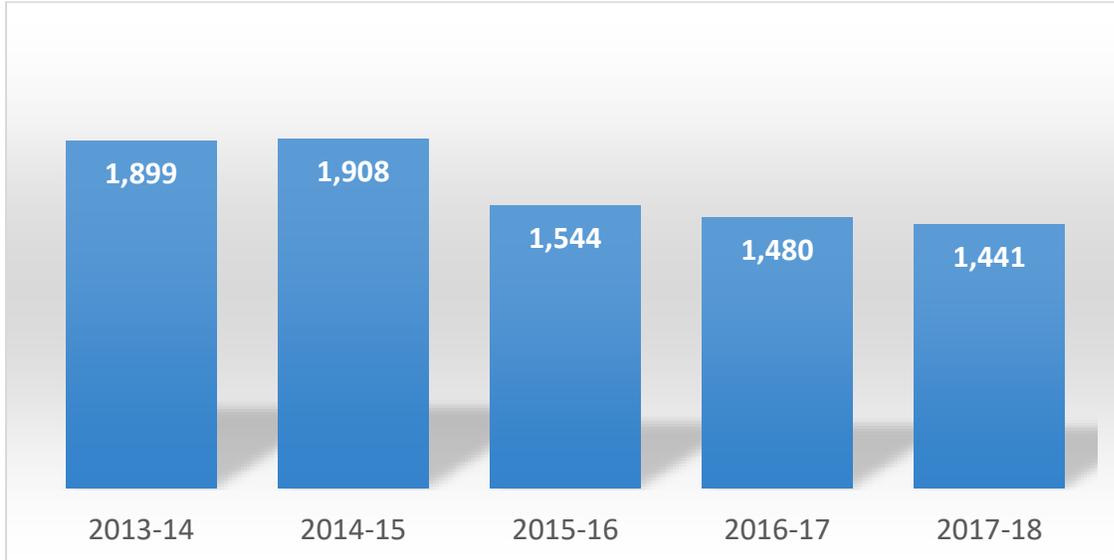

As we moved through 2017-18, there was a small decrease in credit hours at 42,209. The FTE and headcount also showed a decrease.

Credit Hour Breakout

Although part-time students make up 64% of students, full-time students generate on average, 64% of total credit hours. Thus, full-time students generate the majority of FTE and student related state aid reimbursement at MPCC. With the student characteristics of MPCC, credit hours better reflect the amount of service the college provides, than does the headcount.

Illustration 2.5: Fall Credit Hours Generated, Full-Time vs. Part-Time

	2013-14	2014-15	2015-16	2016-17	2017-18
Full-Time	14,670.5	13,387.0	12,451.5	12,951.0	13,104.5
Part-Time	9,802.0	10,690.0	7,871.0	8,167.0	7,247.5
Total	24,472.5	24,077.0	20,322.5	21,118.0	20,352.0
% Full-Time	62.5%	59.9%	55.6%	61.3%	64.4%
% Part-Time	37.5%	40.0%	44.4%	38.7%	35.6%

Enrollments also vary by the time of day courses are offered with the majority of course offerings (and therefore student enrollments) in daytime time slots. Illus. 2.8 and 2.9 show that enrollment in daytime courses has remained the student’s number one choice over the last five years, while enrollment in online classes has reached its highest point in five years, and evening class enrollment is declining.

Special Populations-Railroad and Dual Credit Students

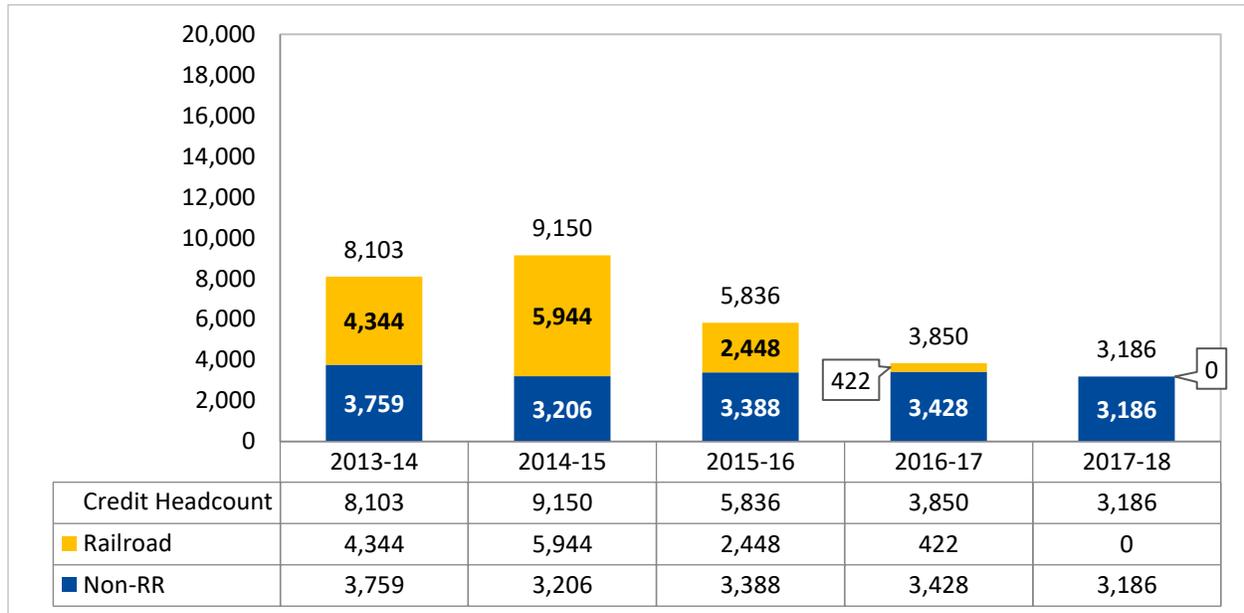

In the 2014-15 academic year Union Pacific Railroad (UPRR) training demand was high due to hiring and training new recruits. The following year was greatly reduced due to the loss of enrollments of their part-time for-credit students. Since then enrollment in UPRR, for-credit, training classes has decreased dramatically.

Dual credit enrollment is a program that allows high school students to earn high school and college credit simultaneously. Credits earned may also transfer to other community colleges or universities. Students who participate in dual credit enrollment typically graduate from college in less time or with fewer demands on their schedule than those who do not participate in dual credit.
